

BMP 099 - Prepare Appropriate Spill Prevention and Response Plans

Description of Potential Pollutant and Source: Spills of significant materials may be exposed to storm water and transported to storm drains and/or receiving waters.

Description of BMP: Prepare the appropriate plans to comply with all local, state, and federal regulations related to spill prevention and response. The plans may include a Spill Prevention, Control, and Countermeasure (SPCC) Plan, Business Plan, Hazardous Materials Management Plan, and others. The plans should cover all industrial activities involving material handling and storage. (40 CFR 300 requires that sites which store or dispense petroleum products have an SPCC plan.)

The plans address actions that should be taken in the event of a spill of hazardous materials. The plans should include the location of necessary equipment (e.g., absorbent material, fire extinguishers), and internal and external reporting procedures including the names and phone numbers of the appropriate people to notify in the event of a spill. In addition, the plans should describe specific material handling procedures and storage requirements.

Application Guidance: N/A

Training: Personnel will be trained in the appropriate procedures for all spill prevention and response.

Effectiveness and Cost: This is an effective, low-cost BMP.

Limitations: None
